PROFESSIONAL SUMMARY

Motivated Backend Developer with 3 years of experience building scalable web applications and RESTful APIs. Proficient in Python, C#, and Django framework with strong expertise in database design and management. Currently gaining hands-on experience as a Backend Developer Intern at Ghana Water Company Limited. Passionate about writing clean, efficient code and implementing best practices in software development.

TECHNICAL SKILLS

Programming Languages: Python, C#, Java, Bash

Frameworks & Libraries: Django, .NET Framework, .NET Core

Databases: PostgreSQL, MySQL, SQLite3

Tools & Technologies: Git, GitHub, Docker, REST APIs, Linux/Unix

Core Competencies: Backend Development, API Design, Database Design, Version Control, Containerization, Agile Development

PROFESSIONAL EXPERIENCE

Backend Developer Intern

Ghana Water Company Limited (GWCL) | Accra, Ghana | 5/16/2025 – Present

- Develop and maintain backend services and APIs using Python and Django framework
 - Design and optimize database schemas using PostgreSQL to improve query performance
 - Collaborate with cross-functional teams to implement new features and resolve technical issues
 - Utilize Git and GitHub for version control and code collaboration
 - Participate in code reviews and contribute to improving development best practices
 - Deploy and manage containerized applications using Docker
-

PROJECTS

Airbnb Clone

Technologies: Python, Django, PostgreSQL, Docker, Git

- Developed a full-featured vacation rental platform with user authentication and authorization
- Implemented RESTful APIs for property listings, bookings, and user management
- Designed and normalized PostgreSQL database schema for efficient data storage and retrieval
- Integrated payment processing and booking management system
- Containerized application using Docker for consistent deployment across environments

Blog Application

Technologies: Django, Python, PostgreSQL, Bootstrap

- Built a dynamic blog platform with CRUD functionality for posts and comments
- Implemented user authentication system with registration and login features
- Designed responsive front-end interface using Bootstrap for optimal user experience
- Developed admin panel for content management and user moderation
- Optimized database queries to reduce page load times by 40%

Weather Application

Technologies: Python, REST APIs, Git

- Created a weather forecasting application integrating third-party weather APIs
- Implemented location-based weather data retrieval and display
- Developed user-friendly interface for real-time weather information
- Utilized API authentication and error handling for reliable data fetching

Portfolio Website

Technologies: Django, Python, SQLite3, HTML, CSS

- Designed and developed personal portfolio website to showcase projects and skills
 - Implemented contact form with backend validation and email notification
 - Created responsive design ensuring compatibility across devices and browsers
 - Deployed application on cloud platform with continuous integration
-

EDUCATION

Bachelor of Science in Computer Science

University of Ghana | [Lego, Ghana] | Expected Graduation: 9/1/2026

Current Year: 3rd Year

Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Software Engineering, Operating Systems, Web Development, Object-Oriented Programming

ADDITIONAL INFORMATION

Languages: English (Fluent), [Other languages if applicable]

Interests: Open Source Contribution, Cloud Computing, API Development, Database Optimization
