

Education

University of Ghana	Legon, Ghana
Bsc Computer Science with Statistics	September 2023 - Current
Koforidua Snr. High and Technical School	Koforidua, Ghana
	September 2018 - November 2021

Skills Summary

- Languages: Python, SQL, Java
- Frameworks: Pandas, Numpy, Scikit-learn, Matplotlib
- Tools: Power BI, Excel, PowerPoint, Tableau, MySQL, SQLite
- Platforms: Snowflake, AWS, Google BigQuery
- Soft skills: Excellent communication, rapport building, Strong Stakeholder management

Work Experience

COOPERATE VENTURE CAPITAL AND BUSINESS ANALYTICS EXTERNSHIP| HP TECH VENTURES|

- Conducted market analysis aligned with HP Tech Ventures’ investment thesis, assessing startup landscapes and emerging market trends.
- Sourced and identified startups fitting investment criteria, drafting investment summaries for potential deals.
- Evaluated and prioritized startup investment opportunities, using HP’s investment benchmarks to guide decision-making.

Sales Associate Intern At MTN Ghana

- Collaborated with the sales team to analyze customer data, identifying trends that improved client acquisition strategies, increasing sales by 10%.
- Utilized Microsoft Excel to track sales performance metrics and generate reports for senior management, enabling data-driven decision-making.
- Conducted market research and competitor analysis, producing actionable insights that influenced pricing strategies and promotional campaigns.

PROJECTS

ANALYZING MOTORCYCLE SALES: [link](#)

Conducted a comprehensive analysis of motorcycle part sales by writing complex SQL queries to determine monthly net revenue for each product line across different warehouses. The project involved aggregating and filtering sales data, subtracting payment fees from total revenue, and generating valuable insights for business stakeholders.

ANALLZING STUDENT’S MENTAL HEALTH: [LINK](#)

Analyzed student mental health data to identify patterns, trends, and factors affecting mental well-being using statistical analysis and data visualization tools.

Processed and cleaned data from surveys or academic records to ensure data accuracy and consistency.

Used statistical tools (e.g., R, Python, Excel) to perform correlation analysis and identify key factors influencing mental health, such as academic stress, social factors, or personal circumstances.
